Who We Are

Aeros robotics is a dedicated team of 16 students working hard to design, build and compete in the FIRST TECH CHALLENGE in one of the world's most competitive regions.

In a span of 10 weeks, we turned scraps of metal into a high performance robot capable of manipulating and launching game pieces with the same intensity and drive found in sports.

Our Mission

Our mission is to introduce robotics to the youth of Kanata and inspire students to pursue careers in STEM. Through Mentorship and teamwork, we help develop young minds with the skills to problem-solve, lead and perform under pressure.

As a community based team, we extend these opportunities beyond the classroom into a real professional-grade engineering environment.

WHAT IS FIRST ?

FIRST is a global non-profit organization dedicated to inspiring young people to explore careers in STEM.

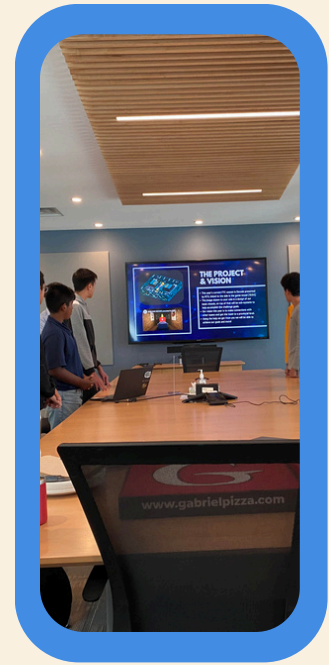

They organize multiple STEM oriented programs, including FTC, which our team competes in.

Why Support us

Your partnership helps keep our team affordable and accessible to the many youth of our region, while putting your logo and brand in front of thousands of students, future industry professionals and current industry professionals.

Our sponsors are recognized at major regional level competitions that draw over hundreds of attendees each, with visibility on team social media, merch and event materials.

Funding Needs

Our goal is to fundraise \$10,000 this season to cover team expenses. This money is used to buy Robot materials, tools and equipment, registration fees and merchandise.

Your sponsorship helps us keep this program affordable for our team members and ensures our team is sustainable and long lasting.
